## Crane Components <br> Quality in Detail

## STAHL CraneSystems Lifting technology|Drive technology|Control technology

High-performance _ the most
comprehensive and complete range of hoisting technology products in the world
> Mature _ drive technology for the highest standards
> Reliable _innovative, efficient control technology

## STAHL CraneSystems <br> 

## Competence from STAHL CraneSystems over 130 years of practical approach and experience

Headquarters and production site in Künzelsau, Germany.

In the R\&D department, competent engineers and technicians design innovative, cost-effective solutions.

1876 Company founded by Rafael Stahl
1898 First electric portal crane
1903 First electric pulley block
1950 The world's first portable miniature electric chain hoist

1998 SH wire rope hoist
2004 World innovation: extra short headroom trolley

2007 | TDC twin drive concept
2008 |STD Vario dual chain hoist

All control technology is installed at STAHL CraneSystems by specialists in accordance with customers' specifications.

Manual assembly of an individual off-standard solution.

Qualified staff work with modern technology in the production area.

All precision parts, for example gearwheels, drive shafts, are manufactured right in STAHL CraneSystems' own factory.

Several thousand hoists and other crane components are produced every year at two production locations in Germany.

Modern manufacturing techniques, certified processes and in-depth final inspections guarantee the consistently high quality of the hoists and crane components.

All over the world, sales partners and customers are trained effectively by specialists from STAHL CraneSystems.

| Type | S.W.L. up to [kg] | Standard reeving | Reeving for true vertical lift | Stationary | Double rail crab OE | Monorail trolleys |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  | KE | UE | DKE |
| SH 3 | 3,200 | $\square$ | $\square$ | $\square$ | $\square$ | - | ■ | ■ |
| SH 4 | 6,300 | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| SH 5 | 12,500 | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| SHR 6 | 16,000 | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| SH 6 | 25,000 | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| AS 7 | 100,000 | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| SHW 8 | 160,000 |  | $\square$ | $\square$ | $\square$ |  |  |  |

SH wire rope hoist _ modular system of superlative quality, offering maximum flexibility.

AS 7 wire rope hoist _ for the
top S.W.L. range up to $100,000 \mathrm{~kg}$.

ST chain hoist _ standard headroom.
STD dual chain hoist _ absolutely a single hoist motor, the load chains run completely in parallel even if the load is unbalanced.

SH 6 wire rope hoist _ safe handling, true vertical lift thanks to two-rope design.

TDC twin drive concept _ doubly safe, for transporting molten metals and similar potentially hazardous goods.
struction, for the heavy load
range from $32,000 \mathrm{~kg}$ upwards.

Short headroom trolley _ patented
design, headroom reduced by approx. $33 \%$.

Extra short headroom trolley _ patented design, headroom reduced by over $60 \%$.

STD Vario dual chain hoist _ with electrically adjustable spacing between the hooks, completely synchronous operation when transporting loads of different lengths.

Crane endcarriages _ with 5 different wheel diameters, low-maintenance direct drive.

SF crane travel drives _ low-maintenance drives with two speeds as standard, push-on motor connection.

Original spare parts _ available for decades, even after the series has been discontinued.

Conductor line _ cable harness reduced by approx. $80 \%$, no need for moving cables and cable trolleys.

Load display _ large-format, four-figure, integrated load summation feature monitors the total load on the two hooks.

STH control pendant _ robust, cost-effective, optional load display.

Radio remote control switches _ compact cubix pushbutton control for one-handed operation, micron pushbutton switch with optional signal feedback from crane, spectrum joystick transmitter (from left to right).

## Explosion-protected crane technology _ uncompromisingly safe

| Application | Category | Protection <br> against | Explosion protection <br> class |
| :---: | :---: | :---: | :---: |
| Zone 1 | II 2 G | Gas | Ex de IIB T4 <br> or Ex de IIC T4 |
| Zone 2 | II 3 G | Gas | Exn de A IIB T3 |
| Zone 21 | II 2 D | Dust | Ex tD A 21 IP66 T 120 |
| Zone 22 | II 3 D | Dust | Ex tD A22 IP66 T 120 |

STAHL CraneSystems is the world market leader for explosion-protected hoist technology, drive technology and control technology.

A single girder suspension crane with $1,600 \mathrm{~kg}$
S.W.L. is used for transporting components for maintenance work in the outdoor area of a chemical plant.

All hoists from STAHL CraneSystems are available in explosion-protected design, this illustration shows an ST chain hoist.
 connecting Ex e to Ex d enclosure.

The SH ex wire rope hoist, as all hoists from STAHL CraneSystems, complies with all technical, normative and practical requirements stipulated by ATEX

Protection against sparks in hazardous areas provided by bronze-coated load hooks.

## - Headquarters

STAHL CraneSystems GmbH, Daimlerstr. 6, 74653 Künzelsau, Germany, Tel +49 7940 128-0, Fax +49 7940 55665, info@stahlcranes.de

## Subsidiaries <br> Sales partners

You will find the addresses of all 11 subsidiaries and over 100 sales partners at www.stahlcranes.com in the Contact section.

Do you need more detailed information?
You can quickly download our extensive brochures directly onto your PC from the download section at www.stahlcranes.com. We would however be pleased to send you the material by post too.
